

# CODE OF ETHICS

**Star Healing Intergalactic Energy™ is a non invasive cellular energy healing system given to Kelly Hampton in 2010 by Archangel Michael.**

## **PURPOSE**

The purpose of the following Code of Ethics is to guide the practice of Star Healing Intergalactic Energy™ including guidelines for defining the status of “in good standing.”

## **DEFINITION of STAR HEALING INTERGALACTIC ENERGY™**

Star Healing is an energy therapy in which practitioners consciously practice in a heart-centered and intentional way to enhance, support and facilitate the physical, emotional, mental and spiritual health of every individual they encounter.

## **GOAL**

The goal of Star Healing Intergalactic Energy™ is to restore greater peace and calm within the body, mind and spirit bodies of each individual to assist in healing. Healing tools are shared with each client to continue their healing during and after every session.

### **1: Scope of Practice**

Star Healing Intergalactic Energy™ practitioners use Star Healing within the scope of their background, any current licensing (if necessary) and credentialing. They represent themselves to the public in accordance with their credentials. They practice within the guidelines of this Code of Ethics; and state/province, local and federal laws and regulations.

### **2: Collaborative Care**

Star Healing Intergalactic Energy™ is a complementary energy therapy, which can be used in conjunction with traditional therapies or as a sole modality. Practitioners know the limits of their professional competence and do not step beyond these boundaries. They do not diagnose, prescribe, or treat medical conditions or disorders unless they hold a license that permits them to do so. They are credentialed and in good standing. Appropriate referrals to other health care professionals are made when necessary. Failure to abide by the first annual recertification process stated in your course terms document results in the dismissal of your certification and the ability to continue practicing Star Healing.

### **3: Intention**

Star Healing Intergalactic Energy™ is used to promote the well being and healing for each client. Client safety, educational needs, and well-being are safeguarded by the practitioner. Practitioners use their abilities with professionalism and a caring heart promising to love unconditionally during the service of this work.

### **4: Principles of Healing**

Star Healing Intergalactic Energy™ certified practitioners know that healing is a personal, individualized process. Practitioners foster an optimal condition for each client to remember and move toward their wholeness

### **5: Respectful Care**

Star Healing Intergalactic Energy™ certified practitioners maintain high standards of professionalism in their care. They treat clients and colleagues with respect, courtesy, care and consideration. They respect the client's right to be involved in their treatment and they empower the client to give feedback, alter or discontinue the session at any time. They also inform every client that this is energy work and energy toxic releases will occur and the protocol to minimize their effects.

### **6: Creating a Healing Environment**

Practitioners provide (when possible) a private, safe environment conducive to healing in which the client can relax and be receptive to the healing process. Safe and clear professional boundaries are described and maintained. Permission for receiving Star Healing Intergalactic Energy™ is obtained through the informed consent process of

the standardized client intake form which must be used to obtain information and signed release of every volunteer and client.

### **7: Disclosure and Education**

Information is provided to the client on an individualized basis taking into account expressed needs and personal situations. The Practitioner informs the client of her/his educational and experiential background in Star Healing and any other related credentials they hold. They also provide an explanation of the treatment to the level of client's understanding, and clearly and accurately inform clients of the nature and terms of the service. The Practitioner discusses the treatment process as well as any relevant limitations or issues before sessions begin. Practitioners supply resources and/or additional materials that may support the client partially through the standardized "follow up" email/procedure.

### **8: Confidentiality**

Client confidentiality is protected at all times and records are kept in a secure and private place in accordance with state and federal regulations. The Practitioner also informs clients of exceptions to their confidentiality such as disclosure for legal and regulatory requirements or to prevent eminent harm or danger to client or others. Client health information and treatment findings are documented appropriately and are specific to the practitioner's background and setting. Information is shared only with client's written permission. The same is true with testimonials. Written permission must be obtained to use them.

### **9: Legalities**

Star Healing Intergalactic Energy™ practitioners are expected to understand and comply with the laws of the state(s)/province in which they are offering Star Healing as well as any federal regulations in regards to obtaining or maintaining a license (normally not required). It is recommended that Star Healing practitioners carry liability/malpractice insurance according to state/province, federal and professional laws to protect themselves and clients. It is expected that Star Healing Intergalactic Energy™ Practitioners will maintain the appropriate business licenses if needed according to their state/province requirements. It is the responsibility of every Star Healing Practitioner to check with their state/province. In many cases, licenses are not needed as there is no touching made with the person.

### **10: Professional Responsibility**

Practitioners and students represent Star Healing Intergalactic Energy™ in a professional manner by exercising good judgment, practicing with integrity, and adhering to this Code of Ethics. Through their words and actions, they encourage ethical behavior of all parties. If they practice any other kind of energy medicine/therapy/modality it is NOT to be conducted during a Star Healing Intergalactic Energy™ session. It is also recommended that as needed, practitioners enroll in the system's refresher classes at any time they feel further instruction may be beneficial to them, and certainly to continue as needed after the first year recertification process.

I HAVE READ THE ABOVE STATEMENTS AND AGREE TO THE TERMS.
